

NOAA Science On a Sphere Users Collaborative Network Workshop
NOTES
Day 3, CREATING NEW CONTENT Session
'Imiloa Astronomy Center of Hawai'i
July 31, 2008
Hilo, HI

'Imiloa welcomed the group, and expressed their interest in co-hosting this workshop, and shared details of their SOS exhibit

Q. Is the Mars movie available?

A. It's on the FTP server

Q. Can we see the Hawaii movie about navigation?

A. Sure

Q. What do you use to make your datasets?

A. Photoshop and Flash and the whole Photoshop suite of products

Q. What are you going to do next?

A. Looking at the spread of human population and migration of people. Also piece on moon phases. It has a Hawaiian cultural component and looks at going back to the moon

Q. How do you use your sphere?

A. We use a playlist that shows Footprints, Mars Landscape of Extremes, the canoe dataset and the NOAA logo. We have people wander in and out as it is on autorun. We do something for school groups too

Q. What does the lighting look like?

A. We keep it really dark with just lights on in the back

Q. Do you want to see it lift?

A. YES
